Ark VFX provides world-class art and animation for the film, advertising, television and video game industries.

Ark has been involved in many projects for triple-A properties over the past few years, including 30 minutes of cinematics for *Driver: Parallel Lines*, HD movies for Evolution's acclaimed PS3 racer *Motorstorm*, an intro movie for the Xbox 360 strategy game *Overlord*, cinematics for Bizarre Creations' shooter *The Club* and work on the teaser for *Motorstorm: Pacifica*.

More recently we've completed an epic trailer for Creative Assembly's *Empire: Total War*, trailers for *Bionic Commando* and *Overlord 2*, as well as a series of four commercials for Kelloggs featuring bizarre fantasy worlds inside a bowl of Coco Pops!

Although often secret and subject to NDA, pre-visualisation and x-movies are something Ark is well suited to; many of our artists worked in video games before joining Ark.

Our speciality is to create worlds previously existing only in the imagination of designers, and to do that in an intelligent way that gives the client maximum value for money. We pride ourselves on providing excellent communication and customer satisfaction, and being UK-based allows us to liaise closely with our clients at all stages of the creative process.
